WORK EXPERIENCE

Jul 2021 ~ present

HYPERCONNECT

Senior Machine Learning Software Engineer Mar 2024 ~ present

Leading cross-team projects, guiding juniors, and contributing to the company's business by software engineeing while mananging technical depts. Mainly design, implement, and review ML backend system.

- Projects: Tinder new AI initiatives (2024 ~ current)
- Recommendation system for Azar, Hakuna, and Enterprise & Feature Store (2024)

Machine Learning Software Engineer Jul 2021 ~ Feb 2024

Designed and developed backend servers and data pipelines interacting with machine learning models (recommendation, moderation). Contributed as a technical lead or project lead roles for some projects. As a result, AI recommendation has driven Azar's double-digit Y/Y revenue growth in 2023 (ref).

- Azar 1:1 matchmaking recommedation system (session-based recsys, uplift, bandit) (2022 ~ 2024)
- Hakuna Live / Enterprise live platform recommedation system (2021 ~ 2024)
- User search system for hakuna and enterprise platform (2022 ~ 2024)
- In-house ML Feature Store (2022 ~ 2024)
- Others: Infra cost optimization for various ML projects, ML-based trust & safety system, developed company-wide internal tools, and lead various TFs.

Jul 2020 ~ Sep 2020 (3 months)

NAVER Corp, Software Engineer Intern

- Developed in-house deep learning model portal for AI research scientists in CLOVA.
- Contributed in the in-house vision model training codebase.

Feb 2019 ~ Jul 2019 (6 months)

JENNIFERSOFT, Frontend Software Engineer Intern

- Contributed in frontend part of the monitoring solution for frontend developers (new product of the company)

Jan 2015 ~ Dec 2018

Freelancer Software Engineer

- Developed various application on both backend and web frontend

EDUCATION

Sep 2019 ~ Aug 2021

M.S. in Computer Science, KAIST

Daejeon, Korea

- GPA: 4.0 / 4.3, Advisor: Sunghee Choi
- Thesis: *Progressive Transmission and Inference of Deep Learning Models Served over Network*

Mar 2015 ~ Aug 2019

B.S. in Computer Science, Hanyang University

Seoul, Korea

- GPA: 3.97 / 4.5

SOFTWARE DEVELOPMENT SKILLS

Language	**Python**, Kotlin, Scala, TypeScript, JavaScript
Backend	**FastAPI**, **Apache Flink** (streaming), Spring†
Web Frontend	React, jQuery
Database	**Cassandra** (ScyllaDB), MySQL†, Redis
DevOps	AWS, Kubernetes
ML/Data	**BigQuery**, Airflow, Kubeflow, PyTorch†

†: little experience
Bold: main stack
